

Ocean Safety Launches New Kru Lifejacket Website with new ISO Range

For anyone that has been confused over the multitude of lifejackets available the NEW Kru website will help you at the click of a button.

Featuring the latest ISO regulated lifejackets, the Kru website offers a detail overview and description of the entire range split into adult, child and accessory ranges.

For each individual lifejacket there are easy reference charts that highlight approvals in the leisure, professional, commercial and industrial sectors, that includes approval buoyancy and actual buoyancy levels.

Once the perfect lifejacket has been selected, it is then easy to choose from different colours and methods of inflation such as automatic or manually gas activated. All Kru lifejackets come with a 5 year guarantee as standard and are manufactured in the UK.

Registering a lifejacket, and requesting further details is now made even easier from the website with online forms covering the entire range.
