

PSP EXPAND SERVICES TO YACHT CAPTAINS

PSP Marine Tapes is pleased to announce the introduction of their new captains' page at :

www.admiralpsp.co.uk/psp/products/captains.html

This page features PSP's selection of products that are essential to the safe and efficient running of sail and motor yachts.

Yacht and powerboat captains can review the specialised items on this page and order these products in volume at competitive prices, saving the time and hassle of searching through local hardware shops and chandleries.

The Captains' page includes details of :

- IMO compliant Spray-Stop tape
- SOLAS compliant retro-reflective tape
- Leak-Stop Tape for pipe repairs
- Emergency Exit Tape

Many other essentials are also included in the range, a number of which fulfil legal requirements for safety equipment that must be carried on yachts. A selection of UV resistant tapes and Photoluminescent products are also available.

PSP are offering free Captains' Information Packs with technical details and samples of materials. These are available on request, or via the button on the captains' page.

PSP tapes are all put through rigorous testing and extensive trials to ensure that exactly the right glue or adhesive is used for each product. This ensures that the adhesive bond will not break down following application and that outdoor products are far less likely to suffer degradation in extreme conditions. When each product is tested, it is also put through maximum and minimum temperature tolerances to allow for applications in most parts of the world.

Please visit the PSP Stand No 01.326 at METS Amsterdam to collect a Captains' Pack.

All PSP products are easy to find anywhere in the world - just look for the logo, which is the international code flags 'Papa, Sierra, Papa'.
