

EXPEDITION KAYAKS

GREAT KAYAKS FOR MAGNIFICENT YACHTS

Kayaking is a great, safe way for guests on board a superyacht - and crew - to enjoy and explore coastlines and rivers. The growth of the sport is without question and can be enjoyed by novices along with more experienced paddlers.

So if you are thinking about kayaks and canoes for your superyacht project, then **Expedition Kayaks** offers a range of high quality craft, all beautifully built to suit your specification.

These are not "fun sit-ons" but serious kayaks which offer the potential for a quality paddling experience.

The range of kayaks starts with proven sea kayak designs such as the TIWOK and YSAK, produced in roto moulded polypropylene for tough coastal adventures. They are capable of being dragged up beaches and over rocks with virtually no damage, and are easy to maintain and keep clean.

The next level is from a Kevlar/carbon construction, with the ROBBE and the HUNTER, both developed on the sea racing circuit, offering lighter weight, increased speed and high strength. These are "works of art" and totally in keeping with superyacht surroundings.

All are offered at remarkably competitive prices and can be supplied with the latest paddles, spray decks and accessories to complete the package.

THREE OF THE BEST ...

HUNTER :

The Hunter is a modern design sea kayak, based on the latest carbon/kevlar construction technology and with a proven racing pedigree.

The hull offers 30% more lift in the bow in sea conditions making it a dry boat, but still fast. The deck is also designed so that the water can drain better. The cockpit space is ideal for taller kayakers.

ROBBE :

The ROBBE is a modern design sea kayak, based on the latest carbon/kevlar construction technology and with a proven racing pedigree.

The Robbe has won various medals in international marathon events. Light fast, strong and stable.

YSAK :

Produced in roto moulded polypropylene for a long tough life, the ergonomic design, excellent running properties and stability guarantees the ultimate kayaking pleasure even in the roughest of waters.

This quality, high performance kayak is ideal for long distance touring and sea or river expeditions. It's long waterline ensures excellent tracking and a comfortable paddle.
