

# EXPEDITION KAYAKS

**PRESS RELEASE  
STING IN THE TAIL**

## The new STINGRAY kayak.

The STINGRAY is the ultimate expedition kayak - very fast and very light, yet very strong - and it still has the volume to carry a large amount of equipment. With a length of 5.70 m and a width of 0.52 m, it is currently the fastest kayak in the Expedition Kayaks' range and probably the best looking kayak on the market!

Although designed especially for technically experienced paddlers who want more from their sport, any moderately competent paddler will easily be able to enjoy this high performance and rewarding craft.

The hull shape is based on proven racing designs and is easily driven in all conditions.

The superior construction is the very latest development for kayaks.

Vacuum infusion foam sandwich, with epoxy onto Kevlar/carbon laminates gives an immensely strong kayak, with an impact loading of around 500 kgs!

This construction, including hatches and fittings comes out at an amazing 15.5 kg.

STINGRAY features two large entry oval hatches, luggage rack, front and rear bulkheads, foam sandwich carbon seat, safety lines, complete pedal rudder system and carrying handles.

A full range of colours are also available, as these are hand built craft.

Expedition Kayaks has a complete range of performance craft, all ideally suited to those who want to enjoy performance paddling further afield.

**PRICE**  
£2690.00.
