

## AIRMAT AG+ NEWS UPDATE

### Spacer Fabrics Solve a Variety of Problems for Fast Turn Around Accommodation

Kayospruce has introduced a complete indoor and outdoor solution for a variety of applications in fast turn around accommodation, the Airmat AG+. The spacer fabric is three-dimensional and designed to allow improved airflow, dramatically reducing moisture build up through its 8mm thickness. This provides a solution to the age old problem of left over condensation and resulting mildew growth under mattresses or cushioned areas and Airmat can be easily fitted under any mattress.

As such Airmat is ideally suited for a variety of applications from passenger carrying vessels and military craft through to hotels or swimming pool leisure areas. Widely used in hospitals, the Airmat has a natural silver coating, which is non irritant and resists harmful bacteria to prevent organism growth. The Airmat works well in a damp environment and is fully machine washable, recyclable and flame retardant. The silver coated cushioning is ideal for mattresses or cushions on ferries and workboats, as well as perfectly suited to sun cushions in wet areas such as swimming pools, reducing mustiness and mildew when stored away.

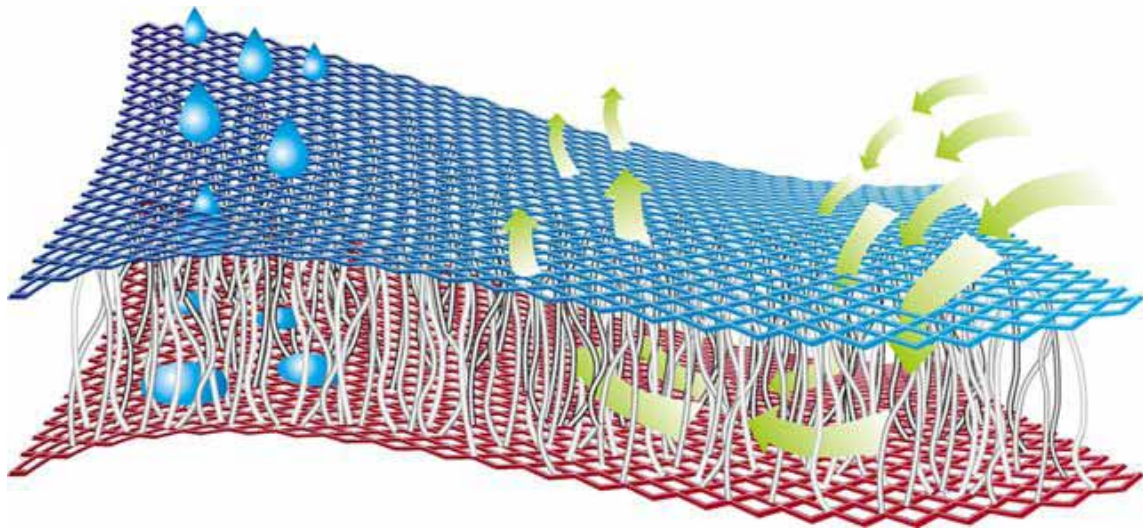

For more information on this innovative, natural mildew resistant cushioning, please telephone or email Kayospruce for a distributor network and information on how mattresses or cushions can be 'cut to fit' or how to order Airmat in quantity for ferries or hotel groups.

**Benefits of Airmat AG+:**

- Machine washable, recyclable and flame retardant
- Can be ordered in small or large quantities
- Slightly cushioned with excellent recovery
- Improved airflow under cushioning or mattress
- Reduces heat and moisture build up

**Technical data:**

- Thickness: 8mm
- Roll width: 205cm
- Roll length: 24m
- Colour: White and silver

Issued 1st November 2010
