

## Coolmat : A micro climate to keep you cool and dry while you rest

CoolMat is a high tech fabric, designed to manage moisture through improved air circulation, to reduce humidity build up while you sleep. It creates a mini micro climate keeping you cool and dry while you rest, whether in an outdoor or indoor environment making it ideally suited to go over the top of any mattress, sun cushion, pillow or sunbed.

The material is manufactured from an innovative fabric which "breathes", so that when you lie on it, the heat and moisture generated by your body will evaporate within the first hour. This then promotes a cool environment while you rest. The make up of the fibre allows the air to flow freely through the fabric and the core, ensuring that no moisture will be trapped inside the mattress, pillow or cushion, eliminating that sweaty and damp feeling.

CoolMat is fully machine washable, making it easy to use at home, camping, in the garden, as well as on board a boat.

Coolmat is sold by the linear metre from a 1.8m wide roll – recommended retail price including vat per metre is **£32.70**.

## Airmat AG+ : The fast way to remove moisture from mattresses

The three-dimensional Airmat AG+ is designed to allow improved airflow, which dramatically reduces moisture build up through its 8mm thickness. This provides a solution to the age old problem of left over condensation and resulting mildew growth under bunk mattresses or cushioned areas on board.

Widely used in hospitals, the Airmat has a natural silver coating, AG+. This specialist treatment is non irritant and enhances resistance to harmful bacteria, working to prevent organism growth. The Airmat is ideal in a damp marine environment whether above or below decks and is fully machine washable, recyclable and flame retardant. The silver coated cushioning is ideal for mattresses or cushions on sailing yachts, as well as perfectly suited to deck sun cushions on powerboats and large yachts, when cushioning needs to be stowed after use. The sun beds can be put away dry and will not develop that musty smell in their stowage locker over time.

For more information on this innovative, natural mildew resistant cushioning, please telephone or email Kayospruce for a distributor network and information on how mattresses or cushions can be 'cut to fit'.

Airmat AG+ is sold by the linear metre from a 2.05m wide roll – so one metre will approximately fit a single berth and 2 metres will approximately fit a double berth – recommended retail price including vat per metre is **£34.95**.
