

Glowfast Luminous Safety Labels

Commercial Glow in the Dark Safety Labels – new from Kayospruce

Find Life Saving Equipment in the Dark Quickly

Kayospruce is launching their new range of luminous safety labels at Seawork. The labels are designed to stand up to a harsh marine environment and aid crew to find safety devices or provide life saving reminders at night without any need for artificial lighting.

With just 10 minutes of exposure to either daylight or torchlight, the labels will glow for up to 20 hours, vastly improving the chances of finding the right piece of safety equipment without losing crucial time in an emergency. Labels for equipment include first aid kit, lifejackets, flares, EPIRB and fire extinguisher, as well as "Remember to Turn Off Gas at Bottle".

The labels come in a variety of sizes and are designed to be easily applied to a clean and dry surface from the self adhesive backing.

Kayospruce can be found on stand number 113 at Seawork.

Labels are available from your nearest retailer or online from <http://www.kayospruce.com>

Issued 14th June 2010
