

NEW MARINA CONSULTANCY TEAM IN ASIA PACIFIC

Marina Projects Ltd and Mott MacDonald Hong Kong team up in a new partnership which offers a seamless collaboration between marina consultancy and maritime – coastal engineering expertise.

Marina developers and investors can now benefit from a comprehensive and unrivalled consultancy service available throughout the Asia Pacific region. Marina Projects and Mott MacDonald Hong Kong are fully committed to providing environmentally sustainable solutions to all aspects of marina design. This teamwork approach has already been applied successfully on the prestigious Baroque on Lamma project in Hong Kong.

Marina Projects has provided advice on all aspects of marina design and waterfront development in over 20 countries worldwide and projects include Porto Montenegro in the Mediterranean.

Mott MacDonald Hong Kong has played a major role in the development of marine infrastructure throughout the Asia Pacific region and utilises state of the art numerical simulation of wave dynamics.

Geoff Phillips, Director of Marina Projects commented :

“In the Asia Pacific region the marine infrastructure requirements will prove fundamental to any marina scheme and it is important to assess the engineering implications at the earliest stage of the feasibility and concept design process. The partnership with Mott MacDonald Hong Kong complements Marina Projects skills and we look forward to expanding our operations in the region”.

Chris Howley, Division Director in Mott MacDonald Hong Kong’s office said:

“We are delighted to be able to continue working with Marina Projects in the Asia Pacific region as the marina development opportunities grow. Our experience in maritime and coastal protection together with Marina Projects marina expertise is unrivalled in the region”.

EDITOR NOTES:

ABOUT MARINA PROJECTS

www.marinaprojects.com

Marina Projects Ltd provides a range of services to the marina and property sector covering all aspects of marina design, waterfront development and operational management. From feasibility and market studies through to master planning and project management, Marina Projects has the international experience and resources to meet a client's most demanding requirements. Marina Projects client list includes private sector businesses, commercial organisations, development agencies, local and national Government authorities. Marina Projects also provides an independent and objective consultancy service for investors wishing to maximise the potential of existing marina waterfront developments.

ABOUT MOTT MACDONALD HONG KONG

www.mottmac.com

Mott MacDonald Hong Kong Limited is a member company of the Mott MacDonald Group providing maritime civil engineering and coastal management services within the Asia Pacific and Australia Region. For over 30 years, MMHK has been playing a major role in marine infrastructure development through planning, investigation, design and construction of reclamations, coastal protection, breakwaters, jetties, piers, wharves and navigational access. MMHK uses state of the art numerical simulation of wave climate: to provide rapid determination and assessment of wave dynamics in coastal zones, ports and harbours; to assess water quality, sediment transport impacts and mitigation due to breakwater construction and harbour formation; and to design coastal protection for natural and man-made shorelines. MMHK's commitment to providing environment-friendly and sustainable design and management solutions is at the core of its maritime and coastal protection portfolio.
