## SEA SURE FOLDING 'COCKPIT LOCKER' BIKES

Sea Sure's Folding 'Cockpit Locker' bikes are now available for Christmas presents for the 2008 Summer Season.

Ideal for stowage in a locker or confined space, Sea Sure's brand new range of folding bikes come in a range of sizes and specifications.

Two sizes of the compact Sea Sure bike come in either a 16" or 20" wheel version, with their own carry bag on wheels.

Both bikes feature 6 speed gears and have a high load rear suspension unit. The handlebars pack down neatly into the steering column, the saddle pushes down into its own column, the pedals flip back and then both bikes can be folded neatly in half to fit into their own carry bag.

The bag includes an angled supported handle, to make it easier to wheel around when packed away.

The third bike in the range is the Sea Sure folding mountain bike, an off-roader, which can also be fitted into a small cockpit locker or stowed unobtrusively.

The bike itself stows into an area of just 95cm x 80cm x 33cm in its own carry bag, and even has an 18 speed gear system.

It features a steel frame for strength and stiffness, and together with the carefully designed rear suspension, provides a firm and comfortable off-road ride.

Prices start from 129.99 (including vat) and are ideal for personal use or even as a 'hire fleet' for marinas and outdoor centres.
